EDUCATION

Chennai Institute of Technology
B.E.Computer Science and Engineering

2024 - 2028
Current CGPA: 9.34/10.0

OBJECTIVE

Computer Science student passionate about frontend and full-stack development, interested in building AI-powered applications and user-centric web platforms. Enthusiastic about exploring prompt engineering and modern AI tools to create impactful solutions

EXPERIENCE

Kalanjiyam Technical Solutions - Web Development Intern

Nov 2025

Developed My Money Manager, a React-based personal finance tracking web application

PROJECTS

Blockchain-based P2P Solar Energy Trading Platform – Decentralized Energy Marketplace

Dec 2025

- Designed and developed a blockchain-based peer-to-peer solar energy trading platform enabling secure and transparent energy transactions between energy producers and consumers.
- Created responsive pages for energy listing, transactions, and user interaction
- Collaborated on integrating frontend with blockchain-based backend

Voice-Based Email Assistant for Visually Challenged – NLP Powered Email Automation

Jan 2025

- Developed a voice-enabled email management system allowing visually challenged users to compose, send, and read emails using speech commands.
- Integrated Natural Language Processing (NLP), speech-to-text, and text-to-speech technologies to enable seamless voice interaction with email services.
- Designed an accessible interface and automated workflows to improve digital accessibility and inclusive communication.

Blockchain-based Medical Supply Tracking System – NGO & CSR Support Platform

Feb 2025

- Designed a blockchain-based medical supply tracking system to ensure transparency and traceability of medicines distributed by NGOs and CSR initiatives.
- Implemented AI-assisted requirement formatting and supply analysis to optimize inventory management for medical shops and healthcare

My Money Manager – Personal Expense Tracking System

Nov 2025

- Developed a web application to track daily expenses, manage personal budgets,Business Transactions and monitor spending habits efficiently..

SKILLS

- HTML
- CSS
- Flutter(Learning)
- JavaScript
- React.js
- Git
- Communication Skills
- Team Collaboration
- Time Management
- Adaptibility

COMPETITIVE PROGRAMMING

Codechef (ais_code_17)
Leetcode (aiswarya_muthukumar_1711)

Max rating: 1143, 130 problems solved, 1 stars
Max rating: 1518, 500+ problems solved

CERTIFICATIONS

- AWS: Cloud Practitioner Foundation
- NPTEL: Introduction to IOT
- Eduskill: Generative AI
- CISCO: Modern AI

ACHIEVEMENTS

- IIITDM E-Summit Ideathon** – Reached Finalist stage for **presenting a technology-driven startup idea.**
- VIT Bhopal Health Hackathon** – Finalist for developing a **healthcare-focused** innovative solution.
- CEG INDCON'26 Hackathon** - Finalist for **Approaching Industry Related Problem** and it's Solution
- Participated in **10x** Hackathon by PPT Submission

Jan 2025

Feb 2026

Mar 2026

VOLUNTEERING

Coordinator of Girl Talk'2026 (Round 2 Online)

Mar 2026

Volunteered in organizing the Girls Talk session, assisting in event coordination and supporting smooth communication and engagement among participants.
